Oxford University Scientist to Give Lecture at Hauptman-Woodward
Elspeth F. Garman to speak at HWI on July 19

Elspeth F. Garman, Ph.D., is scheduled to present a lecture at the Hauptman-Woodward Medical Research Institute on Thursday, July 19, 2007 on the "Current Challenges in Techniques for Structural Biology." The lecture begins at 4 p.m. at 700 Ellicott Street and a reception will follow.

Garman's main research interest is the development and optimization of data collection techniques for macromolecular crystallography.

Garman graduated from Durham University with a bachelor's degree in Physics. She received a doctorate in Experimental Nuclear Physics at Oxford University in 1980 and worked in the Nuclear Physics department at Oxford for seven years following that. In 1987, she moved to the laboratory of Molecular Biophysics at Oxford.

ABOUT HWI

With more than 50 years of exceptional scientific research, HWI is an internationally-renowned independent, non-profit facility specializing in the area of fundamental biomedical research known as structural biology. HWI's team of more than 75 staff members is committed to improving human health by studying the causes of diseases, as well as potential therapies, at their basic molecular level. HWI is located in the heart of the Buffalo Niagara Medical Campus in downtown Buffalo, New York, in a new state-of-the-art structural biology research center at 700 Ellicott Street. For more information, visit HWI's website at www.hwi.buffalo.edu or call 716-898-8600.
