Dr. Nanette Que Joins Hauptman-Woodward

Nanette Que, Ph.D., has joined the Hauptman-Woodward Medical Research Institute (HWI) as a postdoctoral associate. She will be working in Dr. Daniel T. Gewirth’s lab with a focus on biochemical and structural studies of steroid and nuclear hormone receptors.

Prior to joining HWI, Dr. Que worked at Duke University in Durham, North Carolina. She has published more than a dozen papers and currently has a patent pending.

Dr. Que received her Ph.D. in Chemistry from the University of Minnesota in Minneapolis. Prior to that, she received her bachelor’s degree in Chemistry from the University of the Philippines. She now resides in the city of Buffalo with her husband.

About HWI

Celebrating 50 years of exceptional scientific research, HWI is an independent, non-profit facility specializing in the area of fundamental biomedical research known as structural biology. Our team of more than 70 staff members is committed to improving human health by studying the causes of diseases, as well as potential therapies, at their basic molecular level. We are located in the heart of the Buffalo Niagara Medical Campus in downtown Buffalo, New York, in a new state-of-the-art structural biology research center at 700 Ellicott Street. For more information, visit HWI’s website at www.hwi.buffalo.edu or call 716-898-8600.
