Jennifer Riggie Joins Hauptman-Woodward Medical Research Institute

For Release: February 21, 2006

Jennifer Riggie has joined the Hauptman-Woodward Medical Research Institute as a research associate in the laboratory of Dr. Daniel Gewirth.

Riggie's work at HWI will focus on the expression, production, purification, and eventual crystallization of chaperone proteins such as Hsp90.

A former HWI summer research technician, Riggie received her bachelor's degree in biotechnology from the Rochester Institute of Technology (R.I.T.).

Riggie resides in Tonawanda, New York.

Celebrating 50 years of exceptional crystallographic research, HWI is an independent, non-profit facility specializing in the area of fundamental biomedical research known as structural biology. Our team of more than 70 staff members is committed to improving human health by studying the causes of diseases, as well as potential therapies, at their basic molecular level. We are located in the heart of the Buffalo Niagara Medical Campus in downtown Buffalo, New York, in a new state-of-the-art structural biology research center at 700 Ellicott Street. For more information, visit HWI's website at <http://www.hwi.buffalo.edu> or call 716-898-8600.
