Hauptman-Woodward Announces Launch of New Website

The Hauptman-Woodward Medical Research Institute (HWI) has announced the launch of a new website. The site has been redesigned, and has a sophisticated new look, complete with new content, pictures, graphics and improved navigability.

“The website was redesigned with the primary goal of better presenting the work of the HWI scientists to two key audiences - our scientific peers and the general public,” Dr. Charles M. Weeks, senior research scientist and chair of the HWI Scientific Governance Council, said. “The new content and visual design were created to be more comprehensible and interesting for all visitors to the HWI site.”

The site offers behind-the-scenes looks at HWI’s science and staff members, as well as information on upcoming events and ways for community members to become involved.

The HWI website can be accessed at www.hwi.buffalo.edu.

About HWI

Celebrating 50 years of exceptional scientific research, HWI is an independent, not-for-profit facility specializing in the area of fundamental biomedical research known as structural biology. Our team of more than 70 staff members is committed to improving human health by studying the causes of diseases, as well as potential therapies, at their basic molecular level. We are located in the heart of the Buffalo Niagara Medical Campus in downtown Buffalo, New York, in a new state-of-the-art structural biology research center at 700 Ellicott Street. For more information, visit HWI’s website at www.hwi.buffalo.edu or call 716-898-8600.
