Local Scientist to Make Presentations in Boston, Massachusetts

William Duax, Hauptman-Woodward distinguished research scientist, to present at national meeting

William Duax, Ph.D. will give two poster presentations at the Endocrine Society Meeting from June 26-27, 2006.

His presentations will be titled:
- Determining structure and function of steroid dehydrogenase enzymes by sequence analysis, homology models and rational mutational analysis
- The three-dimensional structure of polycystin I: gene expression from alternate coding frames in PKD1 and autoimmunity.

Duax received his Ph.D. in Physical Chemistry from the University of Iowa and a bachelor’s degree in Chemistry from the St. Ambrose College.

About Duax’s Research Interests
Duax is conducting research in the areas of bioinformatics, proteomics and genomics. He is predicting the structure and function of 5000 hypothetical genes that are members of the steroid dehydrogenase family. Members of that family of enzymes are implicated in the origin of cancer, high blood pressure, Alzheimer’s disease, artherosclerosis and polycystic kidney disease. Through analysis of the system of these 5000 proteins and the genes that express them, he is tracing the evolution of the genetic code to its origin more than three billion years ago. He is testing his predictions using the technique he applied in the past to determine the molecular basis for the action of hormone drugs and antibiotics.

About HWI
Celebrating 50 years of exceptional scientific research, HWI is an independent, non-profit facility specializing in the area of fundamental biomedical research known as structural biology. Our team of more than 70 staff members is committed to improving human health by studying the causes of diseases, as well as potential therapies, at their basic molecular level. We are located in the heart of the Buffalo Niagara Medical Campus in downtown Buffalo, New York, in a new state-of-the-art structural biology research center at 700 Ellicott Street. For more information, visit HWI’s website at www.hwi.buffalo.edu or call 716-898-8600.
