Sanjay Connare Joins Hauptman-Woodward Medical Research Institute

Sanjay Connare has joined the Hauptman-Woodward Medical Research Institute (HWI) as a research aide.

He is working in Dr. William L. Duax’s lab where he is researching the role of gene duplication in evolution.

Connare also worked at HWI as a research apprentice for brief periods of time throughout 2002 to 2005. During his HWI apprenticeship, he had several significant accomplishments including: researching Codon Bias/Analysis; helping to develop the codon analysis program; and to write the software program, “Gene Duplication,” both which are being used in the laboratory today.

Connare is also currently working to complete a dual bachelor’s degree in economics and computer science from Case Western Reserve University.

Connare resides in Buffalo, New York.

About HWI
Celebrating 50 years of exceptional scientific research, HWI is an independent, non-profit facility specializing in the area of fundamental biomedical research known as structural biology. Our team of more than 70 staff members is committed to improving human health by studying the causes of diseases, as well as potential therapies, at their basic molecular level. We are located in the heart of the Buffalo Niagara Medical Campus in downtown Buffalo, New York, in a new state-of-the-art structural biology research center at 700 Ellicott Street. For more information, visit HWI’s website at www.hwi.buffalo.edu or call 716-898-8600.
