Caroline Wilmot to Speak at Hauptman-Woodward's Structural Biology Series Seminar

Caroline Wilmot, Ph. D., is scheduled to lecture at the Hauptman-Woodward Medical Research Institute on Thursday, May 24, 2007. She will present her lecture, "Crystalline Enzymology." The lecture begins at 4 p.m. at 700 Ellicott Street immediately followed by a networking reception.

Wilmot is a professor in the Department of Biochemistry, Molecular Biology and Biophysics at the University of Minnesota. She has received a number of awards, her most recent recognition being from the American Crystallographic Association - the 2006 Margaret C. Etter Early Career Award, recognizing "outstanding achievement and exceptional potential in crystallographic research". Prior to that, she received the 2005 Paul D. Saltman Memorial Award, administered by the Gordon Research Conferences for her "outstanding contributions to the fields of Metals in Biology."

About HWI

With more than 50 years of exceptional crystallographic research, HWI is an independent, non-profit facility specializing in the fundamental biomedical research known as structural biology. Our team of more than 70 staff members is committed to improving human health by studying the cause of disease, as well as potential therapies, at their basic molecular level. We are located in the heart of the Buffalo Niagara Medical Campus in downtown Buffalo, NY, in a new state-of-the-art structural biology research center at 700 Ellicott Street. For more information, visit HWI's website at www.hwi.buffalo.edu or call 716-898-8600.
