MOLLY MURRAY JOINS HWI AS A RESEARCH ASSOCIATE

Molly Murray has joined Hauptman-Woodward Medical Research Institute (HWI) as a research associate. She will be working in the lab of Dr. Debashis Ghosh.

Murray will be trained to assist in the Ghosh lab on many ongoing research endeavors by using various specialized techniques supporting the study of:

- The structural biology of estrogen and androgen, key hormones implicated in breast and prostate cancer
- Proteins linked to eye diseases including macular degeneration and retinitis pigmentosa
- A project aimed at the long-term development of a vaccine for skin cancer.

She received her bachelor’s degree in History with a concentration in Natural Sciences at the State University of New York at Buffalo (UB), where she graduated cum laude. She received her master’s degree in Interdisciplinary Natural Sciences from the Roswell Park Division of Graduate Studies at UB.

Murray currently resides in Orchard Park, NY.

ABOUT HWI

With more than 50 years of exceptional scientific research, the Hauptman-Woodward Institute is an internationally-renowned independent, non-profit facility specializing in life-altering research. Our team of more than 75 members is committed to improving human health through the study of the causes of diseases, as well as potential therapies, at their fundamental molecular level. HWI is located in the heart of the Buffalo Niagara Medical Campus in Downtown Buffalo, New York, in a state-of-the-art structural biology research center at 700 Ellicott Street. For more information, visit HWI’s website at www.hwi.buffalo.edu or call 716-898-8600.
