Statement From Hauptman-Woodward Staff and Board

The board and staff of the Hauptman-Woodward Medical Research Institute are tremendously saddened over the loss of former University at Buffalo President William Greiner who died Saturday.

“We extend our condolences to his wife Carol, their family and friends,” HWI CEO Dr. Ed Lattman said. “We will be forever grateful to Bill Greiner for his work on the establishment of the U.B. Department of Structural Biology which is housed at HWI.”

“It was my pleasure to work with Bill for many years, forging closer ties between the university and Hauptman-Woodward that resulted in the development of the U.B.-HWI Structural Biology Department. His care for U.B., Buffalo, and his wife Carol was so evident. His contributions to U.B. and the Western New York community will affect us in positive ways for years to come. We have lost a good friend,” HWI Principal Research Scientist Dr. George DeTitta said.

ABOUT HWI
With more than 50 years of exceptional scientific research, the Hauptman-Woodward Institute is an internationally-renowned independent, non-profit facility specializing in life-altering research. HWI’s team of more than 75 members is committed to improving human health through the study of the causes of diseases, as well as potential therapies, at their fundamental molecular level. HWI is located in the heart of the Buffalo Niagara Medical Campus in downtown Buffalo, New York, in a new state-of-the-art structural biology research center at 700 Ellicott Street. For more information, visit HWI’s website at www.hwi.buffalo.edu or call 716-898-8600.
