REBECCA DEAN JOINS THE CHAUDHURI LAB AT HWI

Rebecca Dean has joined Hauptman-Woodward in the Chaudhuri Lab as a research associate. Dean will participate in research to understand chromosome segregation in pathogenic bacteria for therapeutic purpose.

Prior to joining Hauptman-Woodward, Dean was a laboratory technician at Roswell Park Cancer Institute. She also previously served in the labs at Trinity Biotech.

She received a master’s degree in biotechnology and a bachelor’s degree in biotechnology from the University at Buffalo, as well as professional certifications.

Dean resides in Tonawanda, NY.

ABOUT THE CHAUDHURI LAB

Dr. Barnali (Neel) Chaudhuri is a research scientist at the Hauptman-Woodward Institute, as well as an assistant professor in the department of Structural Biology within the University at Buffalo. She received her doctoral degree in 1998 from Uppsala University in Sweden.

The lab’s principal research interest is to investigate how biological macromolecules function by virtue of their structural design using a hybrid biophysical approach.

ABOUT HWI

With more than 50 years of exceptional scientific research, HWI is an internationally-renowned independent, non-profit facility specializing in the area of fundamental biomedical research known as structural biology. HWI’s team of more than 75 staff members is committed to improving human health by studying the causes of diseases, as well as potential therapies, at their basic molecular level. HWI is located in the heart of the Buffalo Niagara Medical Campus in downtown Buffalo, New York, in a new state-of-the-art structural biology research center at 700 Ellicott Street. For more information, visit HWI’s website at www.hwi.buffalo.edu or call 716-898-8600.
